

LUZOL 250 EP 1

Extreme pressure adhesive grease

Description

With complex soap base, excellent stability during work and in high temperatures. High resistance to water, even under pressure.

Applications

For all types of bearings, gearings or mechanism submitted to severe conditions of use, to high temperatures and speed constraints. Bearings, locks, agricultural equipment, cement works, hydraulic power stations. Suitable for centralized lubrication.

Technical data

Operating temperatures: -20°C to +160°C

NLGI Grade: 1

NDN factor: 500 000
