

HOTLIFE S 119

Special grease for high temperatures applications in the iron & steel industry

Description

High performance grease that could be used under low and very high temperatures. Thanks to a very specific thickener, HOTLIFE S119 keeps its consistency at high temperatures. It possess outstanding resistance to loads and water washout.

Applications

this grease is specifically developped for heavily loaded mechanisms and working under high temperatures.

Technical data

Operating temperatures: -40°C to +180°C (+200°C peak)

NLGI Grade: 1-2

Load: > 620 Kg
