

MULTIGRAPH

Graphite assembly paste

Description

Graphite paste for the lubrication of highly loaded mechanisms working with low speeds. Thanks to its extreme pressure anti-friction additives, this paste allows to avoid the seizing of parts submitted to high loads, shocks and vibrations or to high temperatures. Excellent withstanding to water, damp and aggressive surroundings. It reduces the fretting corrosion too.

Applications

Mechanics: shrinking, keying, corrugated shafts, wheels, bearings, sprockets, loaded toothed gearings. Transmission helicoidally screws, slides. Allows ensuring the dismantling of joints, the lubrication of sluices, taps, etc ... Prevention against fretting corrosion.

Technical data

Grade NLGI: 1/2 Loads: 500 kg Greasy lubrication: -20°C to +140°C Dry lubrication: +900°C
